Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-5 and 13-20 drawn to a foil holder, classified in class 439, subclass 492.
 - II. Claims 6-10, drawn to an electrical connector, classified in class 439, subclass 499.
 - III. Claims 11-12, drawn to an electrical switch device, classified in class 200.
2. Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions are group I for a foil holder, group II for an electrical connector and group III for an electrical switch device.
3. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.
4. A telephone call was made to Salvatore Anastasi (Reg. No. 39,090) on 7/5/07 to request an oral election to the above restriction requirement, but did not result in an election being made.
5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thanh-Tam T. Le whose telephone number is 571-272-2094. The examiner can normally be reached on 7:30-5:00.
